

## The Process:

First, we will assess your skin type, your brows/lash line/lip line, depending on what service you are getting, and what your ideal outcome is.

A 'before' photo will be taken.

We will now decide on the ideal colour/shade for you.

We will now apply a numbing cream and an anaesthetic to the area to lessen or even eliminate pain. The anaesthetic will stay on for minimum 20 minutes.

We then brow map your brows and/or outline your lip line to create your ideal shape/look. When having a lash enhancement, we will simply stay in the lash line so no need to map or outline any shape.

After you have approved the shape, we will begin the permanent makeup process.

Lastly, we apply soothing cream to the area to help with any discomfort and begin to alleviate any redness.

Say hello to your stunning new look and smile for your 'after' photo!
